

Our budget mattress replacement solution that encompasses all the benefits of a high end system, the Aeria 8 Mattress Replacement System is indicated for the prevention and treatment of skin breakdown and pressure ulcers in patients at medium to high risk.

The mattress replacement is constructed from 21 transverse cells – 8 inch 200 mm high – that cyclically inflate and deflate in an alternating pattern. Cyclic alternation of pressure prevents arterial and venous capillary

occlusion in surface tissue – maintaining and stimulating the flow of blood and lymphatic fluids through these tissues to provide essential oxygen and remove metabolic waste.

mattress replacement

- Vapor permeable, waterproof top cover keeps moisture away from the skin; multi stretch fabric minimizes friction and reduces shear.
- Machine washable top cover is fully elasticized for firm fit.
- Static transport function for stable patient handling and transfer.
 - Static head cells for stable head support and optimum user comfort.

control unit

- Economical analogue control unit pumps over six liters of air per minute.
- Fully adjustable pressure level to match individual user weight and comfort needs.
- Quick connector air hose attachments.
- Visible alarm indicator warns of power failure or when cell pressure drops below the accepted minimum level.
- Inbuilt rear hanging hooks for easy mounting and control unit portability.

custom designed carry bag

Stylish carry bag for compact transport or storage. Separate compartments store all product components and collateral, including simple usage instructions and our easy to follow Quick Set Up Guide.

- 21 x 8 inch 200 mm high density cells made from premium quality TPU coated nylon for superior performance, wear and tear. Each cell connects independently to mattress base for easy removal for cleaning or replacement.
- Rapid release CPR tag for emergency deflation.
- Fully adjustable support straps securely fastens system to any standard single bed frame.

technical specification 110V
